# INTERTANKO POSEIDON CHALLENGE

## PORT RECEPTION FACILITIES SURVEY

PRESENTED AT THE INTERTANKO  
HOUSTON TANKER EVENT  
MARCH 2007

## **FONASBA'S CONTRIBUTION TO THE POSEIDON CHALLENGE**

When INTERTANKO launched its “POSEIDON CHALLENGE” in Singapore last year, there was never any question that FONASBA would not throw its full weight behind the initiative. One of FONASBA's primary objectives as an association is the promotion of high levels of professionalism within the agency and broking sectors wherever and whenever the opportunity arises.

At the Singapore event it therefore gave me much pleasure to commit FONASBA to playing its part in achieving the “Three Zero's” that are central to the Challenge and also to offering the services of our member associations in developing an industry-led database of port reception facilities as our tangible contribution to the project.

One year on, and in conjunction with the INTERTANKO Houston event, FONASBA takes pleasure in publishing this first edition of the guide. I describe it as the first edition because the provision of port waste reception facilities for tankers is an on-going process and it will therefore be necessary to regularly update the information provided. We are aware that there are gaps in its coverage and FONASBA will endeavour to close those gaps in future editions. This is a process that should be seen as a joint effort between FONASBA and other sections of the tanker industry, who are invited to comment on the information provided, or add to it. In passing we would like to recognise the particular situation of our member in Mexico. In spite of their best efforts to contribute to this database they are prevented from doing so because the Mexican government considers port waste reception facilities to be a matter of national security.

My colleagues within FONASBA and I very much hope that this publication will be of benefit to INTERTANKO's “Poseidon Challenge” as well as helping the tanker industry achieve the level of recognition it deserves for its ability to carry vast quantities of oil and oil products around the world in all weathers with an enviably high safety record.

**PHILIP J. WOOD FICS  
IMMEDIATE PAST PRESIDENT  
FONASBA**

**LONDON

**FONASBA POSEIDON CHALLENGE  
PORT RECEPTION FACILITIES SURVEY**

Country:	United Kingdom
Association:	
Port:	Scapa Flow
Terminal:	Flotta Oil Terminal
Terminal Operator:	Talisman Energy U.K.
Contact Address:	Flotta oil Terminal, Flotta, Stromness, Orkney KW16 3NP
Telephone:	01856 884201
Fax:	01856 884222
E-mail:	Flotta.shipping@talisman.co.uk
Does terminal accept slops:	Tankers wishing to discharge slops at the Flotta Terminal should be aware of the Terminal Operator's charging policy. With effect from 6th November 2001 a charge of £6.33 per cubic metre will be levied by Talisman Energy (UK) Ltd for slops pumped ashore.
Does terminal accept dirty ballast:	Ballast regulations at Scapa Flow are very unusual in that ALL BALLAST WATER, INCLUDING CLEAN WATER FROM SEGREGATED SYSTEMS, MUST BE PUMPED ASHORE and this rule is strictly enforced without any exceptions. Oil tankers which can not pump segregated ballast ashore should consider whether or not they need to deballast whilst in Scapa Flow and, if so, they should take cargo tank ballast on board, instead of segregated ballast, before arriving at the Pilot Station. The Flotta Terminal Operators will accept dirty ballast ashore except in a few rare cases where the previous cargo carried was a very heavy type of oil, when they may ask the ship to retain on board the last 1 metre, or so, of oil water emulsion. Loading and deballasting may only occur simultaneously where there is a two valve separation; if this is not possible the Terminal will request that as much cargo as possible be loaded prior to deballasting, with the balance being loaded after completion of deballasting, thereby maintaining the tanker in a safe trim at all times in case it should be necessary to unberth her at short notice because of unexpected strong winds.
Via:	Pipeline
Storage capacity:	The water treatment plant has a design capability for handling 40,000 bbls per hour.
Cost:	See slops above
No Information available:

Does terminal accept slops:	Yes The quantity and type of slops / ballast to be discharged is to be pre-notified to the terminal on the pre-arrival questionnaire soonest prior vessel's arrival. On Berthing the dirty ballast/slops will be inspected and Subject to approval by the Storage and Terminal Supervisor, the vessel will be permitted to discharge ashore providing the oil does not require heating. All slops/dirty ballast is received at the Terminal's discretion. Ballast/slops can be received from any of the 4 crude oil jetties. Engine/Bilge slops can be received from all NGL/LPG Berths.
Does terminal accept dirty ballast:	Yes - as above -
Via:	Pipeline
Storage capacity:	There is no maximum / minimum limits providing the Terminal have been advised as soon as possible when large quantities are involved, i.e. above 30 % ships summer deadweight. The ballast/slops is discharged to dedicated shore receiving facilities.
Cost:	Presently, no charge is levied against the vessel.
No Information available:

Does terminal accept slops:	<p>Yes – available on No. 2 Jetty only.</p> <p>Only certain Dirty Tank washings allowed to be discharged over this jetty by pipeline only. (Terminal require to be notified of any requests from vessel's as soon as possible by pre-notification) advising type/quantity and constituencies of slops. Only if Terminal is satisfied that the slops will not be harmful to their effluent plant, will a decision be made to accept slops ashore. On Berthing the tank washings/slops will be inspected/discussed with vessel and thereafter subject to approval by the Terminal Supervisor, the vessel will be permitted to discharge ashore. All slops/Tank Washings are received at the Terminal's discretion. This facility is usually only allowed if the last cargo (slops) is a cargo which is handled by the Terminal and the vessel is loading from this jetty. (The jetty is a very busy working berth). The facility is not used on a commercial basis.</p>
Does terminal accept dirty ballast:	<p>Yes</p> <p>- as above -</p>
Via:	Jetty Pipeline only
Storage capacity:	<p>Only small / limited quantities accepted. (usually between 100-150 CBM).</p> <p>Any larger quantities of slops or Dirty Ballast/Tank Washings, Terminal cannot guarantee to accept. The ballast/slops is discharged directly into shore effluent receiving facilities only. (Maximum quantities up to about 300 CBM).</p>
Cost:	Presently, no charge is levied against the vessel.
